

In re Patent Application of
Stephen E. Frazier
Serial No. 09/923,764
Filed August 7, 2001

In the Claims

Please cancel non-elected Claims 67-74 without prejudice, and substitute the following amended claims. An attachment hereto is captioned "VERSION WITH MARKINGS TO SHOW AMENDMENTS MADE" and includes a marked-up version of the amended specification and claims, showing the changes made by the current amendment.

64. A process of making enhanced activated carbon having an increased capacity for adsorbing chlorine in potable water, comprising:

- a) contacting activated carbon with an aqueous solution of up to about 10% by weight of an enhancer comprising potassium iodide; and
b) drying the activated carbon.

65. The process of Claim ⁶⁴1, wherein contacting is for a time sufficient to saturate the activated carbon with the enhancer.

Please enter new Claim 75 as set forth below.

75. The process of Claim ⁶⁴1, wherein the enhancer consists of potassium iodide.

Remarks

Undersigned counsel appreciates the Examiner's renumbering of the filed misnumbered claims to correct our oversight.
